

MODEL ACTIVITY TASKS
CLASS – X
LIFE SCIENCE

Write the answers to the following questions :

1. Draw a neat diagram of neurone and label the following parts:
(a) Dendron (b) Schwann cell (c) End brush (d) Axolemma
2. Mention the role of meiosis in producing variation in organisms. Write three characteristics of anaphase stage of mitosis.
3. Write three roles of the plant hormone which helps in controlling apical dominance. Mention the role of insulin hormone in controlling the level of carbohydrate in blood.
4. Determine the importance of fins of fish in swimming. Which types of bone joint can be seen in knee and shoulder?

Students will write answers to these activity tasks in subject specific exercise books at home, and submit the exercise books to respective subject teachers after schools reopen. Under no circumstance, students will go out of home.
